Summary

Computer Science undergraduate at Symbiosis Institute of Technology with hands-on project experience across AI/ML, computer vision, NLP, and full-stack development. Currently interning at ServiceNow and deepening expertise in cybersecurity through Cisco Networking Academy. Active ACM member with a track record of delivering end-to-end systems — from embedded hardware to generative AI pipelines.

Education

Symbiosis Institute of Technology **Pune, India**
B.Tech in Computer Science *2024 – Present*

Experience

ServiceNow **Remote**
Software Engineering Intern *2026 – Present*
- Gaining hands-on exposure to enterprise cloud platforms and IT workflow automation on the ServiceNow ecosystem.
- Contributing to real-world projects involving IT service management and process automation at scale.

Association for Computing Machinery (ACM) **Symbiosis Institute of Technology**
Active Student Member *2024 – Present*
- Participates in technical talks, workshops, and hackathons organised by the ACM student chapter.

Projects

Vision-Based Driver Drowsiness Detection & Smart Vehicle Control | ***Python, OpenCV, Arduino*** **2026**
- Built a real-time drowsiness detection system using adaptive eye-closure analysis, achieving reliable detection under varied lighting conditions.
- Integrated Arduino Uno motor control to trigger gradual vehicle deceleration on drowsiness, reducing simulated stop distance.
- Designed modular architecture separating detection, processing, and control layers for maintainability and testability.

MindEase — AI Mental Health Chatbot | ***Python, NLP, Django, MySQL/Firebase, JavaScript*** **2026**
- Developed an AI-powered chatbot delivering CBT-based emotional support with NLP-driven sentiment analysis and intent classification.
- Implemented crisis detection and emergency escalation mechanisms, enabling proactive intervention for high-risk user sessions.
- Built a secure conversational backend with anonymized session handling and database integration for persistent, private user history.

VisionTale — Cinematic Metadata Extraction from Fictional Text | ***React, Next.js, NLP, Generative AI, TTS*** **2026**
- Developed a multimodal AI pipeline that converts narrative text into synchronized cinematic audio-visual experiences.
- Engineered smart narrative classification to distinguish factual vs. fictional content, reducing unnecessary processing overhead.
- Optimized end-to-end latency via parallel async processing and Base64 asset encapsulation; built real-time TTS sync with React state mapping.

Spotify Playlist Analyzer | ***Python, Spotify Web API, Pandas, Matplotlib, Spotipy*** **2025**
- Built a data analytics tool to extract music insights from Spotify playlists, analyzing genre, mood, artist distribution, and tempo trends.
- Generated visual reports on listening behavior patterns using Matplotlib, surfacing actionable playlist recommendations.

Technical Skills

Languages: Python, C, JavaScript, SQL
AI / ML: NLP, Computer Vision, Sentiment Analysis, Generative AI, Machine Learning
Frameworks & Libraries: Django, React, Next.js, Pandas, Matplotlib, Spotipy, Firebase, Arduino
CS Fundamentals: Data Structures & Algorithms, DBMS (SQL, PL/SQL, Triggers), SDLC, Debugging
Cybersecurity: Network Security, Cloud Security, Risk Management, Threat Analysis (in progress)

Certifications

Red Hat System Administration I (RH124 v10) *Red Hat, Apr 2026*
Python Programming with Red Hat (AD141 v9.0) *Red Hat, Apr 2025*
Data Structures and Algorithms using Python – Part 1 *Infosys Springboard, Nov 2025*
Cloud Security Essentials for Executives *AWS Training & Certification, Jul 2025*
AI for Beginners *HP LIFE, Jul 2025*
Cybersecurity Essentials (In Progress) *Cisco Networking Academy, 2026*
